Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-12, 14, 16-18, 20 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Reza et al U.S. Patent Number 6,654,384.

Re Claims 11, 16, 17, and 22, fig. 2 teaches a mobile station communicating over a TDMA control channel with the base station (tuning to an overhead channel) to receive broadcast message; the base station determines the physical parameters and MAC parameters (retrieving...a plurality of parameters) for accessing a communication channel (a broadcast channel) for the service, whereby the mobile adaptively responds (assessing...based on the plurality of parameters) with the changes with the characteristics of the communication channel for receiving the broadcast contents (See col. 5, lines 12 +).

Re Claims 12, 18, refer to claim 11, wherein the parameter includes the physical parameters.

Re Claims 14, 20, refer to Claim 11, wherein the physical layer parameter includes also includes modulation type parameter (a data rate) and a over the air protocol selection such as CDMA, FDMA, TDMA (a radio configuration).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13, 15, 19, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reza et al U.S. Patent Number 6,654,384 in view of Leung et al U.S. Patent Number 6,195,546.

Re Claims 13, 15, 19, 21 refer to Claim 11, Reza et al teaches a physical layer parameter includes a channel selection (a channel identifier). However, Reza fails to teach a broadcast service reference identifier and Service option number. However Leung et al teaches a service option number is implemented into the communication protocol to provide detail information regarding the data to be communication such as voice, data or fax (a broadcast service reference identifier) (See col. 8, lines 7-26). One skilled in the art recognizes that such service option numbers are supported by TIA/EIA-96-C standard defining the group of service options. One skilled in the art would have motivated to maintain compatibility with the known standard. Therefore, it would have been obvious to one ordinary skilled to combine the references.
